UL/FM
Butterfly Valves

Designed for the Fire Protection Industry
Sizes: 2-1/2", 3", 4", 6", 8"
300 PSI Rated
Double Seal Design For Bubble Tight Shut Off
UL Listed and FM Approved
Outdoor Rated
Wetted Components NSF Approved
C.S.F.M. Approved
N.Y.C. Acceptable
Light Weight
Corrosion Resistant: Fusion Bond Coating
Low Torque Operation, High Cycle Life
Easy to Read Flag Type Position Indicator

MADE IN USA
Grooved End Butterfly Valves 2-1/2" to 8"
Figure G300 & 01G 300 psi
with Supervisory Tamper Switch

Wetted Components NSF Approved 4"-8"

2-1/2" to 6"
G300
Outdoor Rated UL/FM

8" Only
01G
Outdoor Rated UL

Note: "E" will be MINIMUM allowed pipe I.D.
Exercise care handling and during installation.
Grooved End Butterfly Valves 2-1/2" to 8"

Figure G300E & 02G 300 psi
with Supervisory Tamper Switch

- Extended Length Valves Equipped with Four 3/4"NPT Ports
- Wetted Components NSF Approved 4"-8"
- 4" to 8" sizes have been Approved by the Foundation for Cross-Connection Control and Hydraulic Research at the University of Southern California

2-1/2" to 6"
G300E
Outdoor Rated UL/FM

8" Only
02G
Outdoor Rated UL

Note: Disc does not protrude past the "B" dimension of the body on any size in the open position. Exercise care handling and during installation.

Updated 04/07/10
Wafer Butterfly Valves 2-1/2" to 8"

Figure W300, W300I, & O1G 300 psi
with Supervisory Tamper Switch

Wetted Components NSF Approved 4" - 8"

2-1/2" to 6"
W300 & W300I
Outdoor Rated UL/FM

8" Only
O1W
Outdoor Rated UL

Dimensions B, D, and E are referenced in Installation Instructions.
"E" is MINIMUM allowed pipe I.D.
Exercise care handling and during installation
Information shown here is intended to supplement, not replace, instructions that is shipped with each valve.

Dimensional information regarding minimum pipe I.D. and disc protrusion are shown on dimensional page for particular valve.

Exercise care handling and during assembly.

**Grooved Body**

For use with grooved end in steel pipe (IPS)

See valve dimensional information for min. pipe I.D. (dimension E)

Valves shall be installed by person(s) certified to install grooved end fittings in a fire protection system by authority having jurisdiction.

1) Place gasket over pipe or fitting to which valve will be joined.
2) Position valve against mating pipe/fitting.
3) Slide gasket into position on valve and adjacent pipe/fitting and install coupling according to coupling manufacturer's instructions.

**Wafer Body**

For installation between two ANSI B16.1, 125 lb. flanges

See valve dimensional information for min. pipe I.D. (dimension E)

1) Two flanged mating pieces should be placed at a distance apart that is slightly more than the thickness of the body (dim.B on wafer table)
2) A minimum of 2 studs shall be placed through adjacent flange holes so that the lower trunnion of the valve can fit between them. Normally this is the bottom 2 holes if the valve will be vertical with open/closed indicator on top.
3) Place the valve between the flanges—take care not to disturb the body gaskets.
4) Place remaining studs around the valve and tighten using an alternating pattern until desired torque is reached.

**Switch Wiring**

1) Valve has internal switches that operate from the OPEN position.
2) One switch has dual leads that is for connection to the SUPERVISORY circuit of an alarm panel. The other switch has single leads and is intended to be connected to AUXILIARY equipment.
3) Unused leads can be tucked into junction box (not provided)
4) Always comply with national codes, local codes, and NFPA 13, 71, and 72.

**01G, 01W, & 02G**

8"

Switch Position Valve Open

Supervisory Switch **Black**

Ground Screw **Green**

Auxiliary Switch **Black/White**

Rated: 120 VAC, 28 VDC, .25 A

---

**G300, G300E, W300, & W300I**

Sizes 2-1/2" to 6"

Switch Position Valve Open

Supervisory Switch **Blue**

End of Line Device or Next Valve **Blue/White**

Auxiliary Switch **Brown/Orange**

Rated: 120 VAC, 28 VDC, .25 A
