

ISCO FABRICATED FITTINGS NOW ASTM F2206

ISCO has taken another step in the advancement of producing high-quality fabricated HDPE fittings. Our fabricated elbows, tees, reducing tees, and end caps are now produced and tested in accordance with ASTM F2206. Some of the key elements of F2206 are:

- Equivalent Dimension Ratio (EDR) identified by sticker.
- EDR matches fabricated fitting to pipe DR.
- Fittings produced with heavier wall pipe.
- Sizes up to 63-inches.
- Ensures high-quality fabricated fittings.
- Welds performed by certified fusion techs.
- Testing results available upon request.
- Fittings produced and stocked across the United States.
- Fusion ends beveled to DR pipe upon request.

ISCO fabricated fittings represent the culmination of our performance and service history. Our commitment to quality is evident in our qualification and testing in accordance with ASTM F2206. The ISCO advantage is exemplified by our ISO and ASME quality management systems. ISCO's commitment to quality provides its customers with confidence that fabricated fittings produced by ISCO meet the most demanding pipe applications.
